Description GNT9 SW modification AMD needs to do some SW modification on GNT9. They will pay for this. Waiting for better needs explanation. GNT9 SW modification The GNT9 Kiosk version seems to be quite interesting for managing patients with advance bookings. Once the kit has been produced via the Kiosk, is the system able to send the information to MW? If so, we could discuss it with Cielo to see if it is possible to prioritise this patient for blood sampling. AMD GNT9 00 000000 0000 00000, 0000 AMD 000000. 00000 00000 0000 00000 00000. [PEAKS]

03/03: Needed to provide additional info by PEAKS. Fabio has sent specific mail on 02/03

29.04: Once the GNT) has completed the patient kit production it is needed to send out a message to inform that that patient has been produced and available for blood collection. So the sw that is managing the waiting patient can cal him with priority
